The keywords in English are missing. The first three paragraphs begin with sentences that are too cliché, without scientific support. Therefore, it would be interesting to support this information, such as the demand for the study of phenomena of humanitarian culture and critical thinking. It is advisable to indicate the sources of the tables. It is recommended to remove the numbering of the paragraphs in the conclusion, so that there is greater textual fluidity. In addition, after the MANDATORY CORRECTIONS, it is recommended to publish the article, since it deals with a topic of outstanding relevance in the contemporary scenario of the field in which it is inserted.
